

I have been a faithful XM subscriber since it first became available, and I'm very please with the quality of services offered. The XM Instant Traffic & Weather was a long awaited feature for me. I Work in DC and I'm sure I don't have to tell you how bad traffic can be here and how much it changes with the weather fluctuations. Since I am paying to listen to this radio service they should be able to offer services like this customized to my local area. As a fellow broadcaster, Service member, and citizen, I strongly urge you to reject the NAB's petition 04-160!
